**Additional Documentation
For Temporary Disabilities Associated With
Muscle Weakness or Limited Range of Motion**

Additional Documentation. Obtaining a permit for a temporary disability under Section II.B. will require that:

- a. If the extent of your disability has never been measured or tested, your physician or chiropractor will need to direct the administration of the testing procedures indicated below. The results will need to be attached to this application.
- b. Previous test results may be used for documentation if your physician or chiropractor is willing to attach those results to this application along with a statement that your condition continues to be disabling.

In Wisconsin, Registered Occupational and Physical Therapists are licensed to conduct exams for muscle and range of motion disabilities. The therapist, **ON ORDERS** from a physician or chiropractor, will conduct a test of the area of the body that you feel restricts your use of conventional archery equipment because of temporary muscle weakness or limited range of motion.

NOTE TO EXAMINER:

You may use any medically accepted standard testing procedures to examine for muscle weakness or range of motion limitations of the shoulder. You should ascertain from the applicant or physician or chiropractor which muscle group is the source of the disability. Pain or lack of endurance alone cannot be used as grounds for granting a crossbow permit. Loss of function of the arm or hand must be substantiated through use of the standard upper extremity pinch, grip and 9-hole peg test. A score below the tenth percentile in any ONE test is sufficient proof to grant the permit.

If muscle strength tests are scored using the scoring grades "normal" through "zero", scores at "fair" or below are sufficient proof to grant the permit. If tests are scored using the "5" through "0" scoring grades, a score of 3 or less is sufficient proof to grant the permit. If tests are used using "functional" scoring grades, scores of "nonfunctional" or less is sufficient proof to grant the permit. If the range of motion disability is less than 50% of full range, the permit can be granted.

If the applicant is being tested for a "coordinative" disability and is given the "nine (9) hole peg test" and the score falls below the age-sex adjusted 10th percentile, the permit can be granted. If the "Mathiowetz" scoring tables are used, age and sex adjusted scores higher than 1.4 times the mean are sufficient for granting the permit.

If age and sex adjusted percentile scoring tables are used (such as the grip or pinch tests), scores falling under the 10th percentile are sufficient proof to grant the crossbow hunting permit. If the "Mathiowetz" scoring tables are used, scores falling below 55% of the age and sex adjusted mean scores are sufficient proof to grant the permit.

ATTACH A COPY OF YOUR TESTING PROTOCOL AND RESULTS, AND CHECK THE APPROPRIATE METHOD THE APPLICANT REQUIRES ON THE PREVIOUS PAGE. PERMIT CANNOT BE APPROVED WITHOUT RESULTS ATTACHED TO THIS APPLICATION.)

BASED ON THE EXAMINATION CONDUCTED,

THE APPLICANT IS ELIGIBLE FOR A PERMIT TO HUNT WITH A CROSSBOW

THE APPLICANT IS NOT ELIGIBLE FOR A PERMIT TO HUNT WITH A CROSSBOW
